# Lighting for Retail spaces requires continuity, precision, and style

Each application is an opportunity to create a unique blend of colors, temperatures, orientations and controls to make a customer's buying experience comfortable and efficient and Holophane has a solution to make every retail application functional and beautiful.

### Phuzion™ PHG LED High Bay:

**Eliminate Dark Ceilings** with custom optics that deliver up to 12% uplight and help reduce the cave-like effect.

**Remote mount option** separates driver housing from LED housing to allow for shallow mounting or more aesthetic look.

**Aircraft Cable Mounting Option** allows for one for one replacement of linear fixtures

### Phuzion™ PHS LED High Bay with Uplight:

**Intentional uplighting**, creates consistent lighting uniformity for an open look and feel you can see.

**Remote mount option** separates driver housing from LED housing to allow for shallow mounting or more aesthetic look.

## Phuzion™ RPHS Remote LED High Bay with Uplight:

**Remote mount facilitates** shallow mountings by allowing the driver housing to be installed up to 50ft. away.

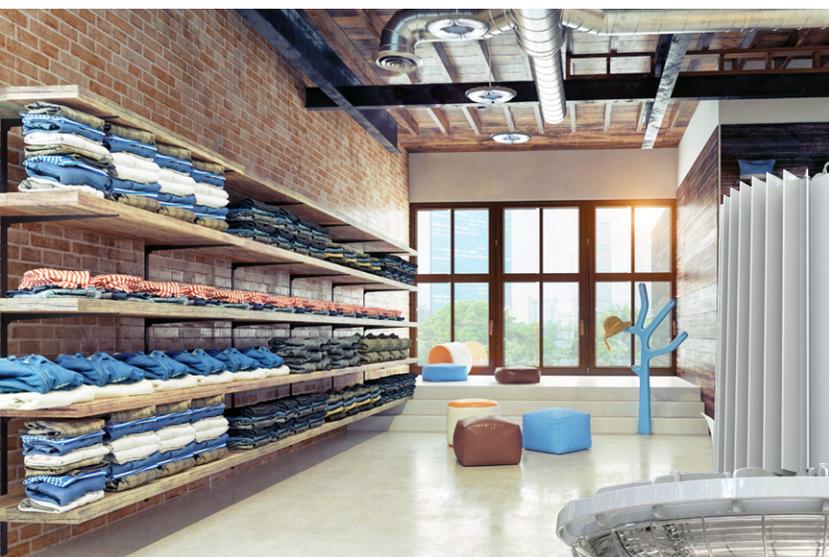

**Borosilicate Glass** maintains the highest levels of luminosity over time while resisting impacts. Won't fade or discolor.

## Phuzion™ PHZ LED High Bay :

**Intricate prismatic design** and optional frosted glass optic provides even greater diffusion of light and glare control.

**Wireless controls** enable lights to be easily configured to respond to one or more priorities from simple on-off commands to more advanced time and/or zone scheduling.

## Phuzion™ RPHZ Remote LED High Bay :

**Separates driver housing and LED housing** (up to 50') to allow for shallow mounting heights as well as, stem and inverted mountings.

**Hook or pendant mountings** protect electronics by allowing them to be mounted in cooler temperatures than the optics.

## Controls Solutions

nLight® is a sensor-based network digital lighting controls system that offers wired and wireless lighting controls, easily connecting fixtures, sensors, and other control devices to create a digital network. The nLight platform of products enables ease in specification, installation, and ownership, making it the go-to digital lighting controls platform for specifiers, contractors, and building owners.

nLight® AIR wireless lighting controls are a smart solution for simplifying installation and aiding in energy code compliance.

rPODB 2P DX

Mobile Device

## Simple as 1,2,3

1. Install the nLight® AIR fixtures with integrated smart sensor
2. Install the wireless battery-powered wall switch or nLight AIR enabled battery powered ceiling mount sensor
3. With our CLAIRITY™ Pro app, pair the fixtures with the wall switch or remote ceiling mount sensor and if desired, customize the sensor settings for the intended outcome

### Benefits of nLight® Lighting Controls in Industrial Applications

#### Savings

Achieve energy and labor savings as well as rebate potential

#### Easy to Use

The nLight AIR integrated sensor is an occupancy sensor and photocell that works out of the box; use the CLAIRITY™ Pro app to adjust sensor settings

#### Scalability

Configure the light you need and easily scale from one room to multiple sites with the nLight platform

#### Aids in Code Compliance

Set light levels in a given space as defined by the specific building code (when entering or leaving a room, as an example)

Warranty Five-year limited warranty. Full warranty terms located at [www.acuitybrands.com/CustomerResources/Terms\\_and\\_conditions.aspx](http://www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx)
