

# Solutions for Industrial and Warehouse

## Real Time Location Systems (RTLS) using Holophane Lighting

WHERE ARE MY FORK TRUCKS AND OPERATORS?  
HOW CAN WE OPTIMIZE OUR MATERIAL HANDLING  
FLEET? WHERE ARE MY RAW MATERIALS, WIP AND  
FINISHED GOODS?

These questions, and so many more, can all be answered through Atrius services and a Real Time Location System you can rely on. Location awareness allows you to continuously improve ROI, by optimizing asset utilization, visualizing operational flow and gaining business intelligence so you can focus on your priorities, giving you a competitive advantage.

### Gain Spatial Awareness with Atrius®

Atrius provides solutions that track and manage assets, visualize and map dynamic environments, and deliver precise location services for facility and operations managers. Additional Atrius services can manage utility bills and reduce environmental footprint. By embedding Bluetooth Low Energy radios into Lighting, Atrius transforms spaces to become more connected and discoverable.

### CREATE A SAFER AND MORE PRODUCTIVE WORK ENVIRONMENT WITH HOLOPHANE

We are committed to providing exceptional lighting products and control solutions, giving our customers the greatest value through superior visibility, energy efficiency, reliability, quality and service. Coupled with nLight AIR controls, Holophane lighting delivers unsurpassed flexibility with RTLS capability.

### What makes the combined Atrius and Holophane solution different?

**Accelerated ROI** – Leverage RTLS to optimize your fork truck fleet and eliminate trucks you don't use. Reductions in capital and operating costs can accelerate the ROI for the entire relight, not just RTLS.

**Ubiquitous** – Technology integrated in your space's architecture.

**Cost Effective** – Beacons embedded and powered through Holophane's light fixtures, requiring no additional installation or maintenance, eliminating redundant hardware infrastructure and devices.

**Scalable** – Easily extend coverage to additional, updated or new spaces.

**Integration** – Location-aware data can be visualized using turn-key maps and dashboards or layered into existing enterprise systems.

**Flexibility** – Full end user customization of dashboard tools to suite your operational requirements where you need it.
