

# LIGHTING SOLUTIONS FOR WAREHOUSE APPLICATIONS

# EXCEPTIONAL PRODUCTS, SERVICES, AND TECHNOLOGY TO HELP DIFFERENTIATE YOUR WAREHOUSE

From storage racks to loading docks, lighting in warehouse applications must provide energy-efficient illumination with superior performance and reliability to support the daily operation of a safe working environment. With falls, slips, and trips being the second most common reason for fatal occupational injuries, proper illumination both inside and outside facilities is crucial. Paired with controls capabilities, a complete LED lighting solution can reduce maintenance costs by up to 40%.

## FIND RECOMMENDED LIGHTING SOLUTIONS FOR WAREHOUSE APPLICATIONS

Lighting and controls solutions tailored to your facility, combined with the information you need to complete your project. Get spec sheets, BIM and IES files, utility rebate calculations and more.

# SPOTLIGHT ON: LIGHTING AND CONTROLS TAILORED TO WAREHOUSE APPLICATIONS

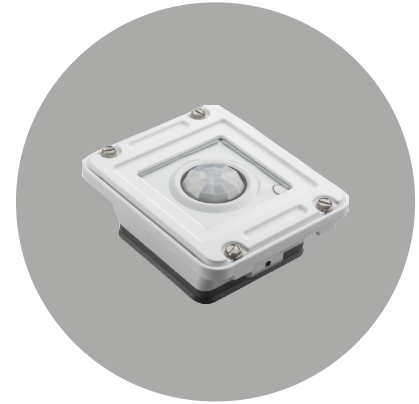

## Phuzion™ High Bays

The Phuzion family of LED high bays combines the technical innovations of LED with prismatic borosilicate glass optics, combined with high lumen outputs, nLight AIR™ Wireless controls, and DLC Premium listings to safely and effectively illuminate your facility.

## Predator® LED Utility Floodlights

By combining the robust mechanical design features with the optical expertise and permanence of prismatic glass, the Predator LED industrial utility floodlight excels as a direct retrofit for both yoke and knuckle mount floodlights.

## nLight®

nLight wired and wireless networked lighting controls are easily specified, installed and scaled to grow with your building, perimeter, and site applications. Indoor and outdoor spaces can be controlled seamlessly while both saving energy and meeting code requirements.
