

LIGHTING SOLUTIONS FOR WATER TREATMENT APPLICATIONS

EXCEPTIONAL PRODUCTS, SERVICES, AND TECHNOLOGY TO HELP DIFFERENTIATE YOUR WATER TREATMENT PLANT

Lighting in water treatment applications must provide adequate illumination that enhances worker safety, improves productivity, and reduces maintenance costs. In spaces with demanding environments, look for hazardous-rated luminaires with listings such as C1D1, C1D2, C2D1, and others. Well performing lighting solutions in these applications should include durable luminaires with precise optical control and uniform illumination, paired with controls, to reduce energy consumption and ensure these needs are met.

SPOTLIGHT ON: LIGHTING AND CONTROLS TAILORED TO WATER TREATMENT APPLICATIONS

C1D1 Hazardous Portfolio

Designed for hazardous environments, the C1D1 portfolio from Holophane is ideal for environments where explosive and flammable gas, liquids, or vapors are present in normal operating conditions.

Petrolux® Low & High Bay Lights

The Petrolux family is designed to perform where dust, dirt, moisture and more are a concern. With hazardous ratings to meet the needs of your challenging environment, 10KV surge protection, durable optics, and more, choose Petrolux for your bay lighting.

Predator® LED Utility Floodlights

By combining the robust mechanical design features with the optical expertise and permanence of prismatic glass, the Predator LED industrial utility floodlight excels as a direct retrofit for both yoke and knuckle mount floodlights.

nLight®

nLight wired and wireless networked lighting controls are easily specified, installed and scaled to grow with your building, perimeter, and site applications. Indoor and outdoor spaces can be controlled seamlessly while both saving energy and meeting code requirements.
