

# Parkpak<sup>®</sup> LED

## Stairwell and Low Bay Luminaire

### Typical Applications

Commercial Buildings

Parking Garages

Warehouses

Industrial

Airports

Hospitals

Hotels

With energy savings and expected service life superior to HID and fluorescent, the ParkpakLED luminaire excels in stairwell and low bay lighting applications. By combining the robust mechanical design features with Holophane's optical expertise and permanence of prismatic glass, this luminaire focuses on high performance, long life and visual comfort while enhancing safety in your building.

- + Replaces 70-250W MH luminaires
- + Eight lumen packages from 2,300 to 9,600 lumens
- + 10kV/5kA surge protection
- + 3000K, 4000K and 5000K CCT and 70 CRI (80 CRI option)
- + L70 LED and driver life greater than 100,000 hours
- + Small, low profile footprint and light 25 pound weight
- + Borosilicate prismatic glass or polycarbonate refractor
- + Robust design with IP66 rating
- + Multiple lighting distributions
- + Emergency Backup Driver and dual fuse option
- + Simple tool-less installation
- + Pendant or surface mount design with multiple conduit entries
- + Control options include Acuity Brands XPoint, and an adjustable output module or IR motion sensor

# Parkpak<sup>®</sup> LED

Available in both cutoff and uplight configurations

No refractor for zero-uplight applications

Durable prismatic refractor provides uplight and increased visual comfort

IP66 rated LED engine provides efficiency and uniformity through high LPW and precision Holophane optics.

IP66 rated electrical contains high performance driver and the Acuity Brands 10kV/5kA surge protection device.

Silicone gasket on the removable door to the IP65 rated optical compartment keeps moisture and dirt from entering.

Dual stainless steel latches with tamper-proof option provide access to electrical housing.

Robust 3G-rated cast aluminum construction provides exceptional durability and thermal management.

Optional emergency backup driver with external test button.
